Issue: **Upcoming Bigelow 589 Training**

Water Measurement and Reporting Courses Scheduled

UC Cooperative Extension is offering a Water Measurement and Reporting Course in Sonoma and Mendocino counties. The training is offered for those who divert (store) more than 100 acre-feet (AF) per year and would like to be able to install and maintain water measurement devices without having to hire a 'qualified' individual. Diverters with less than 100 AF also have the option to attend if desired. These courses are occasionally offered in other regions of the state; thus, you are encouraged to take advantage of attending if applicable. The *same* course is offered at two locations on Tuesday, November 12: 8am in Cloverdale and 1:00pm in Ukiah.
